OptoSigma and Laser Point srl Announce a New Partnership, New Calibration Center is Now Available at Optosigma USA.

Milan/Santa Ana, May 2021: A world specialist for laser measurement instruments, Laser Point srl and *OptoSigma*, a global manufacturer based in the USA, Japan, and Europe, have entered into a new partnership and distribution agreement. The agreement includes distribution of Laser Point's laser measurement instruments for North American markets, through *OptoSigma's* website and sales channels.

Within the agreement, Laser Point will manufacture and supply state of the art laser measurement instruments exclusively to OptoSigma within North America. All of these products will be available from *OptoSigma's* newly enhanced website, either from USA stock, or within a reasonable time frame.

Laser Point and Optosigma are always focused in providing a local and efficient after-sales service to all of their customers. We are proud to announce that a new calibration center is now available in the USA, operated in Santa Ana, California, by Optosigma USA. With this local facility, our customers will benefit from short lead times and reduced shipping cost for periodic recalibration of their laser measurement devices.

"We are very proud to have found in *OptoSigma* an experienced and reliable partner for the distribution of our products. Thanks to our complementary product portfolio in laser measurement and beam delivery, OptoSigma and Laser Point will definitively provide a one stop customer experience and strong, local technical support" says Andrea Brinciotti, CEO of Laser Point.

"We are very excited to have created this strong partnership with a trusted leader in laser power meters. We believe the technology, precision, and overall quality align well with our high quality standards. The suite of measurement instruments compliment our existing product lines perfectly and enables us to broaden our portfolio to offer cutomers more of a one stop service for all of their

photonics component and instrument needs, says Scott Rudder, CEO of *OptoSigma USA*.

About Laser Point srl

Laser Point has more than 30 year experience in developing and manufacturing high quality Laser measurement instruments. These products bear innovation, original design, proprietary, and patented technologies. Among those new technologies is the market introduction of High Speed Laser Thermal Sensors able to accurately measure ULTRAFast LASERS and Laser absorbers capable to resist the disruptive power densities of multi-kW and high brightness Lasers. Laser Point strictly works with OEMs to supply application-oriented, innovative Laser measurement solutions for industrial and medical applications.
